## Projects

---

### Password Generator | [Website](#) | [Source Code](#)

HTML5 | CSS3 | JavaScript

- Built a secure password generator producing **two random passwords per click** using JavaScript, combining letters, numbers, and symbols for enhanced security.
- Implemented a **copy-to-clipboard feature** and styled a responsive UI for consistent experience across desktop and mobile devices.

### Random Quote Generator | [Website](#) | [Source Code](#)

HTML5 | CSS3 | JavaScript

- Built a web app that displays **random inspirational quotes** with a single button click using JavaScript, styled with responsive CSS.
- Implemented smooth **fade-in animations** for quotes and buttons, ensuring a visually engaging experience across devices.

## Work Experience

---

### Walmart

Dec 2023 – May 2025

*Online E-commerce Department Manager*

*Hamilton, Ontario*

- \* Led a team of **10+** associates and standardized daily workflows; this improved order processing accuracy and reduced customer wait times by **15%**
- \* Coordinated and reviewed **150–200+** online grocery orders per day by managing back-office tools, resolving payment exceptions, and assigning workloads, resulting in smoother same-day fulfillment
- \* Optimized staging, inventory handling, and service-station readiness, which decreased operational delays and helped prevent an estimated **\$5,000** in annual reprocessing costs
- \* Delivered consistent customer support across departments, strengthening understanding of user behavior and digital-to-physical shopping flows

## Technical Skills

---

**Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript, Tailwind, Python

**Developer Tools:** Git, GitHub, VS Code, npm, Vite

**Libraries/Frameworks:** ReactJS, NodeJS

**Core Competencies:** Responsive Web Design, REST APIs, Component-Based Architecture, Debugging, Problem Solving, Clean Code Practices

## Education

---

### Sheridan College

Jan 2020 – May 2021

*Diploma in Advertising and Communications*

*Ontario, Canada*

- Graduated with **GPA: 3.78**

### Scrimba

May 2025 – Dec 2025

*Frontend Engineering Bootcamp*

*Online*

- Completed intensive 230+ hour project-based curriculum covering React, JavaScript, HTML, CSS, and real-world frontend workflows

### Codecademy

Nov 2025 – Expected May 2026

*Computer Science Program*

*Online*

- Learning foundational computer science concepts including data structures, algorithms, and object-oriented programming to strengthen problem-solving for frontend development

## Achievements

---

- Completed **6+ contributions** to open source projects during **Hacktoberfest 2025**, featured in the official Hacktoberfest newsletter.
- Created a glowing button effect in a frontend project, which was **featured in Scrimba's newsletter**, demonstrating UI creativity and attention to detail.
